

America Starving in the Land of Plenty

Part One “The Fuel Squeeze”

Today’s topic is the first of three different parts. In the land of plenty we are prevented access to our own natural resources by our state and federal governments. Alaska has enough natural resources to meet our needs for thousands of years. Part One will address the Alaskan Fuel Squeeze.

Alaska, the largest State in the Union, has the most reliable and unfathomable abundance of natural resources in all of the 50 states (or is it 58? ask Obama). This statement cannot be challenged or debated by anyone with a degree of intelligence; yet, of all the States, Alaska has the least amount of say in the U.S. House of Representatives. Rhode Island with its 1200 hundred square miles has more ‘say and pull’ than we do!

“They” can nullify any of our benefits that would bring prosperity, or can they? Those Democratic fools in the Congress of this nation and even some of the Republicans have held our national survival in low esteem to enrich their own agendas and their own popularity. **In truth - we as a nation have been sold out.**

There is not one reason that we should import one drop of oil from any foreign source for thousands of years; especially from a Mideast people with an ideology of hope for the death of this nation. We have allowed this nation to be bankrupted by those who say they are for the good of the nation. We have villages in Alaska receiving fuel oil from a ‘compassionate dictator’ in Venezuela - while those that govern this land say what can we do? Alaska leaders want to subsidize these needs from the state treasury. They say we have laws and restrictions that keep us slaves in our land (Alaska) and we cannot prosper. Or can we?

Most of the leadership in Alaska since January 3, 1959 has bent the knee and bowed to the Federal Government’s demands and were persuaded to enforce legislation as if they were a god that could make unilateral decisions over our land.

The problem with most Alaskans is their dreaded ‘fault of ignorance’. The ignorance of not knowing what is yours by right or letting anybody of the legislature make decisions that bind future generations to the poverty of their minds. This may seem so righteous and earth shattering that if not heeded would bring immediate destruction to the nature of the planet, through guilt, deceit or fraud - whatever manipulation it takes to enslave a people to the gods of government.

Take for instance - Global Warming. This concept has been found to be a ‘fraud’ I always thought and knew it was because I am always leery of people who carry a set of chains when they speak. They tell you it’s for your own good so they make laws and force you to obey them. The gods of government have promoted this global warming lie, to every fabric of American society and built laws (chains) to stop the growth and

prosperity of this land. We in Alaska do not have to stand for it!

How many of you have read the Alaska State Constitution? If you go to your local library and ask for a copy, they will give you a copy for free (that your money already paid for). Article 8 of the Alaska State Constitution describes the State's resources, "To be the Peoples' and the State is to have authority of how its designated lands and resources are to be used to the benefit of the Alaskan citizens and for future generations."

I recently read in the Anchorage Daily News (11/5/09) how Shell Oil Corporation has decided not to pursue drilling in some of its lease areas in the Chukchi Sea area because of an environmental lawsuit from the North Slope Borough and needing two permits from the Environmental Protection Agency.

Hey Folks, our Trans-Alaskan oil pipeline is running two-thirds empty... And the next day, (11/6/09) Exxon and Royal Dutch Shell Corporations announced they are "willing to spend 50 billion in Iraq to develop a new field." It makes me wonder if our troops have brought a stable market to an Islamic nation and is there to ensure the security of these new fields, while in Alaska we pay some of the highest prices for fuel in the Nation.

Something is wrong. Something is wrong. Something is wrong.

The question is not what can I do about it, but what are you going to do? I have a plan, do you? I have a dream, do you? I have a goal to see Alaska have the lowest fuel, gas and electric rates in the US. Do you?

The great thing about a dream is you can share it with someone else and they can make it their own. Right now under the **Initiative Section** of my website, is a plan to bring the cost of gas and diesel/fuel oil down to a \$1.00 a gallon for the rest of eternity or as long as these fuels are needed and create a Second Permanent Fund check.

For those of you who do not remember in 1980 the Congress / Federal Government illegally locked up 19.5 million acres known as the Arctic National Wildlife Reserve. This is my message to Congress, "**we're takin' it back!**"

As long as I breathe - I'm not going to be living in a cave just to make some bureaucrat happy in their world utopia, where they make all my decisions for me. In my administration **I will not let tired old laws and chains govern. I will examine what laws have been usurped from our State and bring a constitutional interpretation back into our God given Rights for this land.**

I hope you find this interesting because I need **YOUR HELP** to make it happen.

Thank you, Gerald L. Heikes
